50 GHz Ram memory- 6 00GC System Type- 64-touch OS Audio Credit card Realtek HD Audio Motorist- 6.. I have uninstalled both driver and equipment and reinstalled I have disabled front side jack detection, and furthermore have established entrance and back jacks to play audio concurrently.. I am hoping that someone here will become capable to help me I have got read through a great deal of write-up regarding realtek and windows 7 and have got not been recently capable to 1) solve the zero sound concern, but 2) i have got now maintained to obtain sound manager to sign up a headphone ánd mic when nothing is connected into the top jacks.
